PROBLEM

Consumers are losing. Badly. Every single day.

Customer satisfaction scores have fallen for 5 consecutive years. The gap between what people expect and what companies deliver has never been wider.

300M+

US consumers file a
complaint annually

\$250B

Lost annually to
unresolved disputes

73%

Give up before
getting resolution

4.2hrs

Average time wasted
per complaint

"I just gave up. It wasn't worth the fight anymore." — Typical consumer, every day.

SOLUTION

Tell Bubba

BubbaFix.com · AI-powered consumer advocacy

Tell Bubba turns consumer frustration into action — in minutes.

1

Describe your issue

Tell Bubba what happened — airline denied refund, package lost, billing error. Natural language, no forms.

2

AI builds your case

Generates a formal complaint letter, evidence checklist, and the exact regulatory bodies to contact.

3

Follow up until resolved

Tracks your complaint, sends follow-up reminders, and escalates if needed. You win more often.

MARKET SIZE

A massive, underserved market.

Consumer advocacy is a daily pain point for hundreds of millions of consumers.

"Works for the user on day one. No network, no chicken-and-egg."

\$48B^{TAM}

300M+ US consumers with recurring complaints

\$4.8B^{SAM}

Digital-first consumers willing to pay for help

\$480M^{SOM}

Year 3 realistic addressable share

Why Tell Bubba wins:

- ✓ **AI fit is natural.**
Drafting formal letters, knowing what to threaten — trivial for LLMs.
- ✓ **No dominant player**
AI-native consumer advocacy is genuinely uncrowded in 2026.
- ✓ **Recurring use case**
People have complaints every month. High natural retention.

MARKET TIMING

Four tailwinds. One window.

Structural forces make 2025–2027 the optimal build window for this portfolio.

1**AI cost floor collapsed**

The cost to build an AI consumer product dropped ~90% between 2022 and 2025. Products that required \$5M three years ago now cost \$50K to prototype. The window for bootstrapped studios to compete is now.

2**Consumer frustration at all-time high**

Customer satisfaction scores have fallen 5 consecutive years. The gap between expectations and delivery has never been larger. There has never been more urgency for consumer advocacy tools.

3**Social fragmentation creating new spaces**

Mass social platforms are in structural decline. Users are migrating to smaller, intentional spaces. Private, relationship-based alternatives have a genuine market window.

4**No dominant player in these categories**

AI-native consumer advocacy, private family memory, and real-world friendship tools are genuinely uncrowded. Early movers have a real window to establish category leadership before Big Tech notices.

FOUNDER & ADVISORS

John Agostino

Founder & CEO · Bonzoli Technology Group

John Agostino is a business builder and entrepreneur with over 20 years of experience and he has always been an "idea man." Before founding Bonzoli, he founded and launched successful ventures in the Hospitality Sector where his latest achievement has been thriving for the last eight years. He also has experience in the Automotive Industry. Bonzoli was founded after several "ah-ha" moments where he realized there were way too many consumer problems without many solutions---especially technological solutions. He is based in Clemson, SC.

"I built Bonzoli because I kept watching smart people lose to broken systems — and realized AI could finally change that."
